

Water Guidance

Please respect the water tanks/troughs, as they are a shared resource. Help keep them clean by following these simple rules:

- Nothing should be placed in a water tank/trough except a CLEAN watering can or bucket.
- Produce or tools etc, are NOT to be washed in any of the water tanks/troughs (use a bucket or secondary container).
- If you discover a water tank/trough leaking or not working, please report it to the Great Linford Parish Council (01908 606613).
- Keep chemicals of any description well away from the water tanks/troughs and other water supplies. Use a secondary container such as a bucket or watering can to fill a sprayer or watering can containing chemicals. Use the same method to rinse the container after use and dispose of the liquid on an unused area of your own plot.

NOTE: Under no circumstances should chemical containers be washed out in water tanks/troughs. Polluting mains water tanks with chemicals will result in the termination of your tenancy.

- Children are not permitted to play in the water troughs.
